

Philip G. Smith

About me

I have been working as a writer and editor in Seattle since 2002. I enjoy collaborating on projects from brainstorming to iteration to completion. I particularly enjoy working with designers and finding new ways to make words and pictures come together in unique and exciting ways.

I am open to all possibilities on a project and while I can bring singular focus to a task, I am also able to change direction quickly if it becomes necessary. I strive to create copy of which I can always be proud, but I am not afraid of merciless editing.

I am a firm believer that humor is an essential part of any working relationship. I love it when I'm right, but I also enjoy being proven wrong.
